- **Abolish FRONTEX!** Militarized agencies are not a viable way of meeting neither the migratory flows nor the needs of migrants and refugees. Europe should not become a fortress while migrants are exploited as a cheap labour force on the basis of their vulnerable status. **As such FYEG is convinced that FRONTEX must be abolished.** Instead, naval and air search and rescue operations throughout the Mediterranean must be implemented immediately to stop mass killings and deaths at sea.
- **Abolish Dublin!** We demand the immediate implementation of a common European border policy respecting fundamental human rights. The EU must harmonise asylum procedures reflecting the principle of solidarity and inclusive Europe, while actively supporting the UNHCR resettlement programme for refugees. **A fair and humanitarian asylum system must be based on understanding of and respect for the needs of asylum seekers.** Refugees need to have the possibility to apply for asylum in embassies. We demand legal protection and residency status for migrants

Add the amendment and the explanation

The screenshot shows the 'Text' section of the FYEG amendment tool. It contains two text input fields, each with a rich text editor toolbar above it. The top field is labeled 'Text: *' and contains the text 'Add at the end:
and refugees.' A red callout box with a red arrow pointing to the toolbar contains the text: 'Describe what the amendment is. A change, a deletion, adding or replacing'. The bottom field is labeled 'Explanation:' and contains the text 'I chose a bad sentence for this tutorial, but you should describe why you want to change it here.' A red callout box with a red arrow pointing to the text area contains the text: 'Explain why you want the change to be done.' Both fields have a 'Path: p' label at the bottom.
